Objektorientierte Programmierung in Java   openHPI-Java-Team

Cheat Sheet: Kontrollstrukturen

Time effort: approx. 1 minute

Verzweigungen:

```
if(<boolsche Bedingung>){
     //Anweisungen
}else if(<boolsche Bedingung>){
    //Anweisung
}else{
    //Anweisung
}
```

Kopfgesteuerte While-Schleife:

```
while(<boolsche Bedingung>){
    //Anweisung
}
```

Fußgesteuerte While-Schleife:

```
do {
    //Anweisung
} while(<boolsche Bedingung>);
```

Zählschleife:

```
for(int i = 0; i < 10; i++){
    //Anweisung
}
```

About openHPI

openHPI is the digital education platform of the Hasso Plattner Institute, Potsdam, Germany. On openHPI you take part in a worldwide social learning network based on interactive online courses covering different subjects in Information and Communication Technology (ICT).
